

D5 Alternatives

Caldic at in-cosmetics 2018

Product Description

Cyclopentasiloxane, also known as D5, is widely used in cosmetic products due to its functions as antistatic, emollient, humectant, solvent, viscosity controlling and hair conditioning agent.

Featuring Caldic Ingredients

- Linear Silicones
- Natural oils (mineral, vegetal, organic, Polyssan O etc.)
- Esters

What

Caldic offers a broad range of D5 alternatives, like linear silicones, esters and all sorts of oils such as mineral, vegetal, and organic oil.

Why

According to upcoming restrictions (2020) of usage of cyclopentasiloxane in rinse-off applications for Europe, formulators are focusing on formulation with sustainable alternatives to D5.
