

Heat Transfer Fluid Solutions

-100°C to +400°C

About Caltherm

Caltherm® is a Caldic brand. Caldic is one of the world's leading full-service value-add solution providers for the premium life science and specialty chemicals markets. Our extensive range of high-quality thermal fluids have been developed using cutting-edge technology, and are based on the latest generation of raw materials.

Offering excellent compatibility and seamless blending properties, Caltherm products can be smoothly incorporated into virtually any processing environment as an alternative or tailor-made heat transfer fluid. While capable of handling temperatures as low as -100 °C up to a high of +400 °C, Caltherm's reliable solutions fulfill efficiency, operational and safety needs and simultaneously address regulatory and environmental requirements.

The Caltherm product range provides solutions for use across processing industries, including pharmaceutical, food, chemical, oil & gas, solar power, and more. Whatever the set-up of your processing installation, choosing one of Caltherm's solutions, whether an existing formulation or one customized to your situation, will be a valuable investment for the future.

Christophe Mougel
Research Development
& Innovation at Caltherm

“ This complete heat transfer fluid solution combined with our technical knowledge, our expertise of the industrial installation and our wide range of supporting products and services, enables us to drive your efficiencies for a more sustainable future.

“ The power of Caltherm lies in the support we can provide and our tailor-made solutions. By working safely and closely with our customers, we can offer future proof solutions meeting your operational needs.

Caltherm Applications

Freeze Dryer

Food Processing

Pharmaceutical Processing

Chemical Processing

Oil and Gas

Plastic and Rubber

Industrial Laundry

Solar Power

Cleaning Installation

Our range of high-quality Heat Transfer Fluids

Why choose Caltherm?

- Extensive range of high-quality thermal fluids
- Over 30 years expertise in HTF solutions
- Technical expertise on installation and reactivity issue between fluid and manufactured product
- Chemical fluid analysis with on-site testing leading to a diagnostic solution
- Thorough pre-cleaning of processing plant to ensure maximum effectiveness
- Future-proofing approach, including technical needs and regulatory support
- Solutions that are tailor-made for you and your challenge
- Alignment with all business units within your company
- Supports financial proposals and investments
- Service-oriented and personal approach
- Excellent aftercare services, today, tomorrow, and in the future

Important Information about your systems

Information about current HTF

HTF technology:	Reference of current product: steam / glycol / oils	
When installed:		
Volume:		
Last total change-out:	Frequency:	Next change:
Top-up / refill frequency:		
Analysis frequency:		

Information about equipment

Opened or closed system?	Open / Closed	
Range of temperature	Min temp:	Max temp:
Viscosity requirement:		
Max pressure:		
Flash point:		
QHSE requirement / Specific regulations:		
Food grade:		

Get in contact

The Caltherm team of technical experts, equipped with longstanding experience across several industrial sectors, can develop tailor-made solutions to meet specific installation requirements. Initially, the specialists will determine a baseline measurement via an objective analysis of the HTF currently used in your system. Following this, the outcomes of the lab analysis, combined with a site visit to assess the installation, generate a diagnosis which is the starting point to discuss and recommend a solution that meets your requirements - technical, sustainable, efficient, safety or cost-effective – today, and in the future.
